Why Indoor Air Quality Matters to All of Us!

Indoor air environments can affect the Health of the people who live in them. As energy costs have risen, air tightness in our homes has increased “trapping indoor air particulates”. Statistics show, we now spend a remarkable 90%* of our lives indoors. We live, work, grow & play in artificial environments. The concern is, are they healthy? *EPA data

MicroClean 95™ - Helps Remove Unwanted Airborne Allergens & Micro-Particles

Featuring the Patented Carbon Graphite Bi-Polar Micro-Particle Collection System

The Respicaire® MicroClean 95™ CG Hybrid Air Cleaner works on the effective process of Bi-Polar, electro-magnetic attraction to remove harmful, airborne particulates from your indoor air. This includes particles as small as 0.001 microns. The patented Carbon Graphite CG charging system places a powerful Bi-polar electro-magnetic charge on the unique, low static media pads inside each air cleaner. These specialized pads attract, collect & contain harmful airborne particulates. The removal of these troublesome particulates helps to create a healthier, more natural, indoor air environment.

Patented Respicaire® Carbon Graphite Technology

The MicroClean 95™ helps remove up to 95% of unwanted airborne particulates

Maintenance

We recommend internal pad replacement every 4 months. It is important to use genuine Respicaire® Replacement media pads to ensure optimum performance. Contact your local installer or customer service at PH:1-866-876-8044 for assistance.
